JOB DESCRIPTION

GENERAL ROLE

A-Z Solutions is seeking a Field Services Supervisor to oversee installation crews across the Midwest. The successful candidate will possess a robust background in Sub Slab Depressurization (SSD) system design and installation for residential, commercial and industrial applications. Major job duties include instructing field staff on proper installation codes and procedures of environmental mitigation systems in both the field and the classroom. The ability to communicate clearly with management and field personnel is paramount to the job. Ability to travel is required.

DAILY RESPONSIBILITIES

- Train/mentor field service personnel who perform on-site routine services including installation, maintenance and repairs
- Install mitigation systems under direction of Crew Leader in accordance with standards of practice of the company
- Utilize company tools and equipment necessary to conduct mitigation, testing and other activities
- Complete necessary paperwork
- Conduct QA inspections on residential and commercial projects
- Auxiliary Site Manager as needed
- Conduct residential site evaluations
- Other duties as needed
